

ARIES TRADING CONTRACTING AND SERVICES WLL, QATAR

Proposed Website Structure

1. Homepage

- Short intro / tagline:
"Your trusted partner in industrial repair, testing, and calibration services. With decades of experience, certified expertise, and state-of-the-art equipment, we ensure reliability, safety, and performance."
- Highlights of key services
- Certifications / compliance standards
- Quick Contact CTA

2. About Us

- Company history
- Team expertise & riding squad
- Mission and values
- Safety standards & certifications (ISO, IMO, ASTM, NACE, SSPC, Qatar Energy, API, DNV, ABS, LEEA, LOLER)

3. Services

4. Gallery / Case Studies

- Photos of past projects: offshore rigs, marine vessels, load-testing yard, inspection setups

5. Contact Us

- Contact form / service-request form
- Phone, email, map embed

HOMEPAGE CONTENT

"Your trusted partner in industrial repair, testing, and calibration services. With decades of experience, certified expertise, and state-of-the-art equipment, we ensure reliability, safety, and performance."

ABOUT US

Company History

[Content to be provided]

Team Expertise

Aries Trading Contracting and Services is backed by Aries Group's extensive global expertise. We bring together highly skilled professionals with extensive experience in marine, offshore, and industrial sectors.

Mission and Values

[Content to be provided]

Safety Standards & Certifications

- Full compliance with international and Qatar Energy lifting standards
- Adherence to LEEA, LOLER, API standards
- Compliance with international safety standards
- All personnel equipped with valid CDCs, up-to-date vaccinations, and offshore safety training

SERVICES

1. OCTG Inspection and Maintenance Services

Our aim is to serve oil companies by providing timely, high-quality, cost-effective Tubular Inspection Services locally. We have a highly experienced Panel of Inspectors who can be deputed within a short time for the Inspection of Tubulars, BHA, and drill string components.

Drill Pipe Inspection

We provide a full range of pipe inspection sizes ranging from 2-3/8" to 6.5/8" while following customer's specifications and edition of DS-1 or API guidelines.

We have state-of-the-art tube inspection equipment to meet API inspection requirements or third-party inspections, including full-length wall thickness measurement of pipe tubes.

Services include:

- Magnetic particle inspections on tool joints and upsets
- EMI inspection
- Visual Inspection and Thread gauging
- Dimensional Check
- Refacing services
- Straightening services
- Hydro blasting Internal & External
- Cement Removal services

Tubing & Casing Inspection

Depending on client's requirements, the general scope or part of the scope may be covered. Our experienced inspectors follow industry standard guidelines and documented Standard Operating Procedures.

Services include:

- API full length drifting
- FLMPI on Casings
- End area Inspections
- Gauging services
- Wall thickness measurements
- Maintenance services
- Hydro jetting services

Bottom Hole Assembly Inspection

BHA inspections are carried out as per latest editions of API and DS-1 (3-5) guidelines.

Services include:

- Black light inspection of end areas

- MPI on upsets and wear pads
- Visual inspection and thread gauging
- Refacing services
- Straightening services for Drill Pipe and HWDP
- Liquid dye penetrant inspections

We have fleets of BHA Inspection units available in our tubular goods Inspection facility that can also be moved to clients' Onshore & Offshore facilities.

Drilling Handling Tools & CAT IV Inspection

- Dismantling, blasting, inspection, reassembling, repainting, and maintenance of drilling tools such as elevators, slips, and spiders

Additional Services

- Drill Pipe Straightening – Correcting bent or bowed drill pipes to ensure optimal performance
- Refacing – Reconditioning worn tool joints to restore original dimensions and efficiency
- Thread Inspection and Repair – Inspecting and restoring damaged or worn threads on OCTG components
- Non-Destructive Testing (NDT) – Includes ultrasonic, magnetic particle, and eddy current testing to detect internal and external flaws
- Water Blasting – Internal and external cleaning for all types of downhole tools (e.g., drill pipe, BHA, tubing, casing)

Summary of Inspection Services

- Drill Pipe
- BHA Tools
- Casing and Tubing
- Dimensional and Visual Thread
- End Area UT Shear Wave
- EMI

- Drilling Handling Tools
- UT Gauging
- Slickline and Wireline Tools
- Non-Destructive Testing

Summary of Maintenance Services

- Drill Pipe Straightening
- Connections Refacing
- Thread Inspection and Repair
- Drilling Handling Tools & CAT IV Inspection
- Water Blasting

2. Corrosion Control Services

Aries Corrosion Control & Management services is molded out by a group of corrosion experts to deliver prompt solutions for extending the life of structural elements, metal/non-metal, doctored by proper analysis and treatment.

Offshore/Marine structures are built irrespective of the atmospheric conditions to which they are exposed. Hence, proper coating procedure is crucial for any offshore/marine structure for preserving and maintaining it as good as new.

This relies on procedures which include proper surface treatment techniques, required coating materials and methods of applications.

Why Choose Aries Corrosion Control Services?

- Special focus on timely and quality-oriented service with support of acclaimed engineering and inspection background
- Emphasis on the highest quality with safety at every step of the business
- Completed around 1000 major repair projects during sailing with all major shipping companies around the globe
- Local stations and logistics facilities to Far east/middle east and Europe sector
- Holding long term repair contract with major oil/gas carriers
- Furnished with all advanced equipment (Explosion proof hydro blasters/scaffolding materials/Advanced power tooling equipment and

coating application tools)

- Pool of experienced Coating inspectors/Supervisors to assure the job quality and well experienced Hydro blasting and painting team
- Class certified Riding fitters with shipyard experience
- Crews with Valid US/Schengen visas with national CDC to travel around the world

Our Services:

Riding Squad

Our Riding squad has successfully completed 500 projects worldwide. Our experienced & versatile team including 160 crew with valid seamen book and other safety certificates assist clients to keep their vessels running at lowest possible cost by reducing the steel repair and dry-docking duration.

Capabilities:

1. **Ballast Tanks Maintenance Program** - Protection from corrosion, reducing steel repair and maintaining CAP rating
2. **Deck Maintenance Program** - Protection against corrosion, maintaining the appearance of the vessel and providing safe environment for the crews
3. **Accommodation Maintenance Program** - Protection against corrosion, maintaining the appearance of the vessel and clean living atmosphere for the personnel onboard
4. **Steel Repair Team** - Dedicated team of class certified welders/fabricators/deck fitters to attend steel repair jobs during voyage, maintaining overall condition of tanks/decks/out fittings
5. **Pipe Line Cleaning Program** - Protection from internal corrosion, free flow and reducing pipe renewal intervals
6. **Coating Inspectors** - For preparing dry dock specification and docking attendance
7. **HVAC/Insulation and Cladding** - For the repair assessment and refurbishment of HVAC/Insulation and cladding services
8. **Cargo Hold Maintenance** - Coating maintenance and product change washing by using man lift

9. **Helideck Maintenance** - To maintain CAP 437 requirements by sufficient friction and required markings

Equipment & Specialties:

- Ultra-High-Pressure Hydro blasters - Explosion Proof with air compressor (2800 Bar)
- Diesel Driven Ultra-High-Pressure hydro blasters (2800 Bar)
- Water blaster up to 1000 Bar for de-rusting (Diesel Driven/Ex. Proof Electrical)
- Hand tools (Rust-pickers, Scrapers, Chipping hammers or chisels, Wire brush)
- Airless Spray-painting machine
- Scaffolding Materials
- Experienced multitalented riding crews capable of all types of surface preparations, scaffolding erection & dismantling and airless spray application

Hydro Jetting Services

Our Hydro jetting water services provide high and ultra-high pressure water-jet pump units up to 40,000psi utilizing the latest hydro-blasting/Jetting technology and tools available in the market.

Typical applications include:

- Surface preparation
- Exchanger & condenser tubes
- Internal and external coatings removal
- Drill pipe cleaning
- Lancing of Pipelines and Grey Water Lines at Offshore Rig
- Drain Line Cleaning at Shipyards
- Internal Cleaning of Tube Line

Additional Services:

- Industrial blasting & Coatings - Drilling handling tools, Containers, Pipe lines, Racks, skids, Bolts, Flanges, Pressure vessels etc.
- Pipeline internal blasting and coating
- Silo tank cleaning & refurbishment
- Rig Accommodation maintenance program
- Coating Inspection & coating condition assessment
- Cargo Hold maintenance
- Cleaning Jobs - Ballast tank Mud cleaning
- Helideck maintenance

Coating Inspection & Assessment

A Coating condition survey assesses the condition of the fairing, coating system and ballast tank coating.

Pre-docking survey: Our experienced and certified surveyors with valid sailing documents can sail with the vessel and prepare scope of work/budget estimation for maintenance before dry-docking.

Our services include:

- Paint/Coating inspection
- Paint Delivery inspections
- Coating condition survey
- Warranty survey
- Coating project Supervision
- Document review and control
- Coating Specifications review and recommendation
- Coating Super intendency at the time of dry-docking
- Coating surveys to maintain the CAP1 rating of the vessels
- Coating failure analysis

Our services comply with International standard organizations including ISO, IMO, ASTM, NACE and SSPC.

Helideck Maintenance

In an ever-changing environment, a compliant helideck is essential for offshore operations. Aries has well-experienced offshore and onshore teams to perform coating maintenance on different types of helidecks including Aluminum to comply with CAP 437 regulations.

Helideck blasting painting team specialties:

- Surface Preparation:
 - Manual preparation
 - Power tool preparation
 - Blasting
- Protective Coatings:
 - Multi-component system applications
 - Conventional, airless, air-assisted airless, Hopper Guns
 - Non-skid deck & Helicopter-deck coating systems
 - Helideck tile applications
- Tools & Equipment:
 - Ultra-High-Pressure Explosion Proof hydro blasters with air compressors (2800 Bar)
 - Diesel Driven Ultra-High-Pressure hydro blasters (2800 Bar)
 - High pressure washing units up to 500 Bar pressure
 - Bristle Blaster
 - Pneumatic Power tools (Air Hammer, Needle Guns, Angle Grinder etc.)
 - Hand tools (Rust-pickers, Scrapers, Chipping hammers or chisels, Wire brush)
 - Airless Spray-painting machine

3. Marine & Offshore Fabrication Services

We offer specialized marine and offshore fabrication services designed to meet the demanding needs of the maritime and offshore industry. With a team of highly skilled and class-certified welders and fitters, we deliver top-quality

fabrication and welding solutions—offshore, at anchorage, in port, or even while vessels are sailing.

Why Choose Us?

Our crew brings years of experience from major shipyards and offshore environments. Fully compliant with international safety standards, all personnel are equipped with valid CDCs, up-to-date vaccinations, and offshore safety training. This ensures we maintain operational excellence with minimal downtime and maximum efficiency.

Our Core Strengths

- **Class-Certified Welders & Fitters**
Skilled professionals with extensive experience in marine and offshore industries
- **Mobilized Riding Squads**
Ready-to-deploy teams with valid CDCs and offshore credentials, ensuring quick turnaround for sailing assignments
- **Versatile Operations**
Capable of executing projects offshore, at anchorage, during port calls, or in transit—based on your operational needs
- **Shipyard-Experienced Workforce**
Practical know-how from major global shipyards guarantees top-tier quality and precision

Our Services

- Deployment of Class-Certified Welders (4G to 6G) & Fabricators During Sailing
- **Structural Steel Repairs**
Repairs in tanks, decks, and hulls as per class recommendations and inspection reports
- **Structural & Piping Modifications**
End-to-end support including design, engineering, and execution
- **Port-Based Fabrication Services**
Access to all major ports in Qatar via valid port passes, ensuring timely support during port calls and maintenance periods

- **Pre-Fabrication & Offshore Installation**
Skilled teams for structural and piping installation offshore
- **High-Pressure & Low-Pressure Line Re-Routing**
Custom re-routing solutions for offshore rigs and platforms
- **Installation Services**
Includes C&K manifolds, well test lines, and flare booms
- **Sea fastening services** for offshore mobilizations

4. Load Testing, Wire Rope Socketing & Spooling Solutions

At Aries Group, Qatar, we deliver high-quality Load Testing, Wire Rope Socketing, and Wire Rope Spooling services, backed by Aries Group's extensive global expertise. Our services are tailored to meet the needs of the marine, oil & gas, construction, and industrial sectors, with strict adherence to international and regional standards.

Load Testing Services

We offer complete load testing solutions for all types of lifting gears and equipment, available both onsite and at our dedicated testing yard in Birkat Al Awamir.

Our capabilities include:

- Load Testing Blocks up to 200 tons
- Testing Tray with capacity up to 120 tons
- Tensile Test Bed capacity up to 100 tons for destructive and non-destructive testing
- Sample destruction testing of lifting gears in compliance with Qatar Energy lifting regulations
- Proof load testing, Functional and dynamic testing
- Third-party witness certification available upon request

We ensure every test is completed safely, accurately, and in full compliance with LEEA, LOLER, API, and Qatar Energy requirements.

Wire Rope Socketing Services

Our professional wire rope socketing services use high-grade resin (pour socketing) and mechanical methods to create reliable and high-strength terminations, including:

- Full preparation and cleaning of wire ropes before socketing
- Casting and curing with certified resins
- Post-socketing inspection and proof load testing
- Compliance with offshore and heavy lifting standards (API, DNV, ABS)

Each assembly undergoes strict quality control to ensure maximum strength, safety, and durability.

Wire Rope Spooling Services

We provide expert wire rope spooling services for cranes, winches, hoists, and other critical equipment.

Our specialized spooling operations include:

- Controlled tension spooling to prevent rope damage
- Uniform layering to minimize wear and extend service life
- Handling a wide range of rope diameters and types
- Onsite and offsite spooling support across Qatar

Our precision techniques ensure reliable rope performance and reduced maintenance costs.

Why Choose Aries Qatar?

- Modern testing facilities at Birkat Al Awamir
- Certified and highly trained inspection and testing professionals
- Rapid mobilization with riding crew holding port gate passes
- Full compliance with international and Qatar Energy lifting standards
- Comprehensive documentation and immediate certification
- Trusted service partner for leading marine, oil & gas, and industrial companies

5. Valve Servicing, Pressure Testing & Instrument Calibration

Valve Servicing

- **Comprehensive Maintenance and Repair**

We provide maintenance and repair services for:

- Ball, Gate, Globe, Check, Butterfly, Plug, Double Block & Bleed, Knife, Safety, Pressure Relief, Diaphragm, Choke, and Control Valves

- **Industrial Valve and Actuator Services**

- Repair, overhaul, modification, and maintenance for all types of industrial valves and actuators

- **Experienced and Skilled Team**

- Our team specializes in complete valve repair and maintenance solutions

Our Repair & Maintenance Process:

1. Disassembly
2. Inspection
3. Valve Servicing
4. Parts Replacement and Reassembly
5. Testing and Recertification
6. Diagnostic Services, Calibration, and Overhauling of Control Valves

Pressure Testing

- **Wide Range of Testing Services**

We offer pressure testing services in Qatar for:

- Valves
- Cargo Hoses
- Chiksan Lines
- Pipelines
- Flexible Hoses
- Silo Tanks
- Air Tanks
- Pressure Vessels

- **Testing Capabilities**

- Hydrostatic Testing
- Pneumatic Testing
- (Capability up to 40,000 PSI)

- **Detailed Reporting**

Our comprehensive reports ensure confidence in system performance and integrity.

Load Cell Calibration

- **Extensive Calibration Range**

- Calibration for load cells and indicators from a few grams up to 300 tones
- All calibrations are traceable to national standards

- **Expert Team Support**

- Inspection and diagnostics of existing load cells
- Replacement of faulty or aging load cells
- Recommendations for system improvements, including wireless upgrades

Flow Meter Calibration

- **Essential Calibration Services**

- Ensuring operational efficiency and compliance with industry standards

- **Scope of Calibration (In-House & On-Site)**

- Water Flow Meters
- Diesel Flow Meters
- Turbine Flow Meters
- Ultrasonic Flow Meters

- **Certified Technicians**

- Flow meters are calibrated by comparing measurements against certified reference standards for utmost accuracy
